Projects

❖ Personal Portfolio Website (Desktop & Tablet Optimized)

Developed an interactive portfolio website using **React.js** and **Tailwind CSS**, optimized for desktop and tablet devices. Implemented smooth animations with **GSAP** and efficient state management using **Zustand** and **Immer**. Integrated PDF rendering, tooltips, and modern UI components to enhance usability and presentation. Focused on clean architecture, performance, and a polished user experience.

❖ Lexicon – Full-Stack Blog Application

Designed and developed a scalable full-stack blog platform using React.js and Tailwind CSS, with Appwrite managing backend services such as authentication, database, and content storage. Implemented secure user authentication, role-based access control, and complete CRUD functionality for blog posts. Focused on responsive UI/UX, performance optimization, and maintainable component-based architecture.
